2021 Precious Metals Conference
September 2021

CAUTIONARY LANGUAGE, QP STATEMENTS AND LEGAL DISCLAIMERS

Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. There is no certainty that the Indicated Mineral Resources will be converted to the Probable Mineral Reserve category, and there is no certainty that the updated Mineral Resource statement will be realized.

The mineral resource estimates contained herein may be subject to legal, political, environmental or other risks that could materially affect the potential development of such mineral resources. See the Resources Report filed on SEDAR (or the Technical Report, once filed), for more information with respect to the key assumptions, parameters, methods and risks of determination associated with the foregoing.

The PEA is preliminary in nature, includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the PEA will be realized. Mineral resources that are not mineral reserves do not have demonstrated economic viability. The PEA is subject to a number of risks and uncertainties. See below and the Technical Report, once filed, for more information with respect to the key assumptions, parameters, methods and risks of determination associated with the foregoing.

The Troilus project has not been the subject of a current feasibility study and as such there is no certainty that a potential mine will be realized. There is a significant risk that any production from the project will not be profitable with these risks elevated by the absence of a compliant NI 43-101 feasibility study.

The mineral resource estimate disclosed in this presentation was prepared by Mr. Paul Daigle, géo., Senior Associate Resource Geologist with AGP, and the supporting Technical Report was filed on SEDAR (www.sedar.com) under the Company's issuer profile on August 28, 2020. Mr. Paul Daigle, who is an independent Qualified Person as defined under NI 43-101, has reviewed and approved the mineral resource estimate disclosed in this presentation.

The technical and scientific information in this presentation has been reviewed and approved by Kyle Frank, Senior Geologist for Troilus, who is a Qualified Person as defined by NI 43-101. Mr. Frank has also verified the technical data contained in this presentation using industry accepted standards. Mr. Frank is an employee of Troilus and is not independent of the Company under NI 43-101.

The PEA was prepared under the direction and supervision of Gord Zurovski, P. Eng Principal Mining Engineer with AGP. The PEA report is available on SEDAR (www.sedar.com) under the Company's issuer profile or on its website, www.troilusgold.com.

This presentation contains "forward-looking statements" within the meaning of applicable Canadian securities legislation. Forward-looking statements include, but are not limited to, the results of the PEA, statements regarding the impact and implications of the economic statements related to the PEA, such as future projected production, costs, including without limitation, AISC, total cash costs, cash costs per ounce, capital costs and operating costs, statements with respect to Mineral Resource estimates, recovery rates, IRR, NPV, mine life, CAPEX, payback period, sensitivity analysis to gold prices, timing of future studies including the pre-feasibility study, environmental assessments (including the timing of an environmental impact study) and development plans, the Company's understanding of the project; the development potential and timetable of the project; the potential to extend mine life beyond the period contemplated in the PEA, opportunity to expand the scale of the project, the project becoming a cornerstone mining project in Quebec and Canada, the estimation of mineral resources; realization of mineral resource estimates; the timing and amount of estimated future exploration; the anticipated results of the Company's planned 2020 drill program and their possible impact on the potential size of the mineral resource estimate; costs of future activities; capital and operating expenditures; success of exploration activities; the anticipated ability of investors to continue benefiting from the Company's low discovery costs, technical expertise and support from local communities; and the anticipated timing of filing the Technical Report. Generally, forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled",

"estimates", "forecasts", "intends", "contemplates", "goal", "continue", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "will", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements are made based upon certain assumptions and other important facts that, if untrue, could cause the actual results, performances or achievements of Troilus to be materially different from future results, performances or achievements expressed or implied by such statements. Such statements and information are based on numerous assumptions regarding present and future business strategies and the environment in which Troilus will operate in the future. Certain important factors that could cause actual results, performances or achievements to differ materially from those in the forward-looking statements include, amongst others, currency fluctuations, the global economic climate, dilution, share price volatility and competition. Forward-looking statements are subject to known and unknown risks, uncertainties and other important factors that may cause the actual results, level of activity, performance or achievements of Troilus to be materially different from those expressed or implied by such forward-looking statements, including but not limited to: the impact the COVID 19 pandemic may have on the Company's activities (including without limitation on its employees and suppliers) and the economy in general; the impact of the recovery post COVID 19 pandemic and its impact on gold and other metals; there being no assurance that the exploration program or programs of the Company will result in expanded mineral resources; risks and uncertainties inherent to mineral resource estimates; the high degree of uncertainties inherent to preliminary economic assessments and other mining and economic studies which are based to a significant extent on various assumptions; variations in gold prices and other precious metals, exchange rate fluctuations; variations in cost of supplies and labour; receipt of necessary approvals; general business, economic, competitive, political and social uncertainties; future gold and other metal prices; accidents, labour disputes and shortages; environmental and other risks of the mining industry, including without limitation, risks and uncertainties discussed in the latest annual information form of the Company, in the Resources Report (and the Technical Report to be filed) and in other continuous disclosure documents of the Company available under the Company's profile at www.sedar.com. Although Troilus has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Troilus does not undertake to update any forward-looking statements, except in accordance with applicable securities laws.

Cautionary Note to U.S. Investors Concerning Estimates of Mineral Resources

Mineral resource estimates have been prepared in accordance with the requirements of Canadian securities laws, which differ from the requirements of U.S. securities laws. The terms "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are defined in NI 43-101 and recognized by Canadian securities laws but are not defined terms or recognized under U.S. securities laws. U.S. investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be upgraded to mineral reserves. "Inferred mineral resources" have a great amount of uncertainty as to their existence, and great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an "inferred mineral resource" will ever be upgraded to a higher category. Under Canadian securities laws, estimates of "inferred mineral resources" may not form the basis of feasibility or pre-feasibility studies. U.S. investors are cautioned not to assume that all or any part of an inferred mineral resource exists or is economically or legally mineable. Accordingly, these mineral resource estimates and related information may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the U.S. federal securities laws and the rules and regulations thereunder.

TROILUS GOLD CORP. IS GENERATING VALUE BY RESPONSIBLY DEVELOPING ITS PAST-PRODUCING GOLD-COPPER PROJECT

THE LARGEST UNDEVELOPED DEPOSIT IN QUEBEC, CANADA

ESG Leadership

First mineral exploration company to obtain ECOLOGO certification

Strong Cash Position

CAD\$56 million raised in June/July 2021

Located in Top Ranked Mining Jurisdiction

Quebec ranked #6 globally by the Fraser Institute in 2020

Quality Brownfield Project

US\$350M of inherited infrastructure; streamlined permitting

Large and Growing Resource

- 4.96 Moz AuEq (Ind.), plus 3.15 Moz AuEq (Inf.)*
- Updated mineral resource expected in Q4 2021

Robust PEA; Pre-Feasibility underway

PEA results place Troilus among the top 5 gold producers in Canada today

Experienced & Credible Management

Proven track-record of generating value

FAST-PACED ADVANCEMENT SINCE ACQUISITION

Delivering on our vision to become Quebec's next multi-decade gold-copper producer

2017-2021: UNLOCKING VALUE & DE-RISKING

- ✔ **EXPLORATION SUCCESS:** Disciplined exploration (+150,000m), translating to significant mineral growth and evidence of a district scale, generational asset.
- ✔ **ROBUST ENGINEERING:** Initial drilling to robust PEA in under 2 yrs. Inaugural Reserve and Pre-Feasibility underway, targeting a long-life open-pit mine producing +220,000oz AuEq/yr.
- ✔ **LEADERSHIP TEAM:** Assembled an experience and proven team to build the Troilus mine
- ✔ **STAGE of DEVELOPMENT:** Federal permitting process initiates in Q4 2021

2017	2018	2019	2020	2021	2022
<p>Acquisition of Brownfield Troilus Project in Dec. 2017</p> <p>(From 1996-2010, the Troilus Mine produced +2Moz of gold and ~70,000t of copper)</p>	<ul style="list-style-type: none"> • TSX Listing • Drilling initiated • Pre-Development Agreement Signed with Cree Nation • Mineral Resources increase 85% 	<ul style="list-style-type: none"> • Significant expansion of J Zone & Z87 South • Resources increase by another 27% • Discovery & initial drilling of Southwest Zone 	<ul style="list-style-type: none"> • Southwest expansion • Resources increase by another 20% • Robust PEA • Successful regional exploration on expanded property • Dewatering permit (Z87 & J4 pits) 	<ul style="list-style-type: none"> • Acquired UrbanGold • Appointed industry veteran as COO • ~10,000m of drilling/month <p><i>UPCOMING:</i></p> <ul style="list-style-type: none"> • Federal permitting process • Inaugural Reserve • Pre-Feasibility Study (late 2021/early 2022) 	<ul style="list-style-type: none"> • Start Provincial Permitting Process • Feasibility Study • Construction decision by end of year

LEADERSHIP TEAM IN PLACE TO ADVANCE TROILUS MINE RESTART

Experienced Engineering Team, includes:

Richard Harrisson, COO

- Most recently oversaw the engineering and pre-development of the \$1.7 billion Odyssey Project for Canadian Malartic from conception through to the current construction.
- Former Mining Director at Premier Gold Mines where he led the Feasibility Study for the Greenstone open pit project
- He also held a number of positions with Agnico Eagle including Engineering Superintendent at Goldex Mine in Val d'Or, Project Evaluation Engineer at CTMN and Underground Mine Manager at the Kittila Mine in Finland.

Jacqueline Leroux, VP Environment & Permitting

- Metallurgical engineer with +20 yrs of experience
- Formerly held senior positions at Goldcorp, Mason Graphite, and BlackRock Metals where she was responsible for exploration permits, environmental assessment processes and construction permits.

Executive Management

Justin Reid, *President & CEO, Director*

Richard Harrisson, *COO* 🌿

Denis Arsenault, *CFO/SVP Qc.* 🌿

Blake Hylands, *SVP Exploration & Corp. Development*

Ian Pritchard, *SVP Technical Services*

Jacqueline Leroux, *VP Environment & Permitting* 🌿

Catherine Stretch, *VP Corporate Affairs*

Brianna Davies, *VP Legal & Corporate Secretary*

Caroline Arsenault, *VP Corporate Communications*

Daniel Bergeron, *VP Quebec Operations* 🌿

John Matoush, *Community Liaison Mistissini* 🌿

Kyle Frank, *Senior Geologist* 🌿

Board of Directors

Diane Lai, ICD.D, MBA – *Chairperson*

Seasoned executive and entrepreneur with +20 yrs of global marketing experience

Andrew Mark Cheatle, P.Geo. FGS, MBA

30 yrs of international mining experience; consulting Geologist; former CEO of PDAC

Jamie Horvat, M.Sc.

+20 yrs of experience in asset management, particularly resources and precious metals

Hon. Pierre Pettigrew, p.c.

Former Minister of Foreign Affairs to three Prime Ministers; current Executive Advisor at Deloitte

Dr. John Hadjigeorgiou, PhD, P.Eng, FCIM, ICD.D

Pierre Lassonde Chair in Mining Engineering at UofT; consultant to many major mining companies

Dr. Eric Lamontagne, Eng.PhD.

Former Superintendent of the Troilus mine; GM Greenstone JV (Equinox Gold/Orion)

Thomas Olesinski, CPA, CMA

20 years of finance and management experience; former forensic accountant

Justin Reid, M.Sc., MBA

Geologist and capital markets executive with +20 yrs of experience in the mineral resource space

COMMITTED TO THE RESPONSIBLE DEVELOPMENT OF OUR PROJECT

We are committed to creating value for our shareholders while operating in a safe, socially and environmentally responsible manner.

2020-2021 ESG MILESTONES

Sustainable Development Policy implemented at Troilus in 2020, focuses on four pillars:

- **People**
- **Environment**
- **Health & Safety**
- **Communities**

Implementation of the ONYEN ESG Reporting System in 2020

Internationally recognized reporting standards

Recipient of the 2020

**EXCELLENCE IN
SUSTAINABLE
DEVELOPMENT AWARD**

presented annually by the
Quebec Mineral Exploration
Association (AEMQ).

**ECOLOGO Certification
in August 2020**

Troilus proudly became the first
company to obtain certification
for UL 2723 Certification Program
for Responsible Development for
Mineral Exploration

**Inaugural ESG Report
launched in 2021.**

troilusgold.com/sustainability

83% of energy used at the Troilus site comes from renewable sources

30% of senior management and Chair of the Board are women

90% of water used at site is reused and recycled

Zero work related injuries at site

Local suppliers made up 62% of procurement spending

LOCATED IN ONE OF THE WORLD'S BEST MINING JURISDICTIONS

- Low-cost operation location
- Quebec is ranked 6th globally on the “Investment Attractiveness Index”*
- Established regulatory and permitting framework
- Access to qualified mining labour, suppliers & contractors

Chibougamau (~170km south of Troilus)

Abundant, low-cost and clean energy.
83% of energy currently used at the Troilus site comes from renewable sources.

Fair and stable
taxation system

Strong collaborative efforts
between Governments and
mining industry to support
mineral development

**Financial participation in mining
projects by Government**
Investment arms of the Qc. Gov.
own ~12% of Troilus shares.

Quebec vision to develop the
North in cooperation with First
Nations and local communities

*According to the Fraser Institute's annual survey of mining (2020)

STRONG & SUPPORTIVE SHAREHOLDER BASE

Committed, Long-Term Shareholders & Partnerships

Strategic Partnership with the Quebec Government

- \$11.15 million invested in Troilus in July 2021 through *Investissement Québec*
- Defines a long-term strategic framework focused on outlining and establishing full project financing options for the development of the Troilus Project

The mining potential of Nord-du-Québec and our mining industry are key to the sustainable recovery of Québec's economy. That's why we are helping Troilus carry out its gold project, which is expected to generate significant economic benefits and create good jobs in the region.

Eric Girard

Minister of Finance & Minister of Economy and Innovation

We are proud to support the development of this promising gold project, led by a strong team. Troilus activities have a significant impact on employment and on the economy of the Nord-du-Québec region and we are pleased to help solidify the financial health of the company to allow it to continue its activities and carry out its project.

Dany Pelletier

Chief Investment Officer of the Fonds de solidarité FTQ

THE BEST PLACE TO FIND GOLD IS WHERE GOLD WAS PRODUCED

2016 INHERITED RESOURCE

2019 NEAR-PIT GROWTH

2020 EXTENSIVE MINERAL SYSTEM UNCOVERED

2018-2021 NEAR-PIT RESOURCE EXPANSION

Main Mineral Corridor, Long Section Facing Northwest

SOUTHWEST ZONE - GAP ZONE

- New discovery late 2019/early 2020
- Similar geology to Z87
- Accessible via road
- Priority growth target; multi-million oz potential

Z87 SOUTH - Z87 - J ZONE

- Formerly mined pits
- Significant near pit expansion
- Remains open on strike & at depth
- Infill & expansion drilling underway

ALLONGÉ

- 110 g/t Au grab sample (Dec. 2018)
- Near-term growth target

- 2020 Resource Envelope
- PEA Pit Shell (2020)
- 2018-2021 Holes Drilled

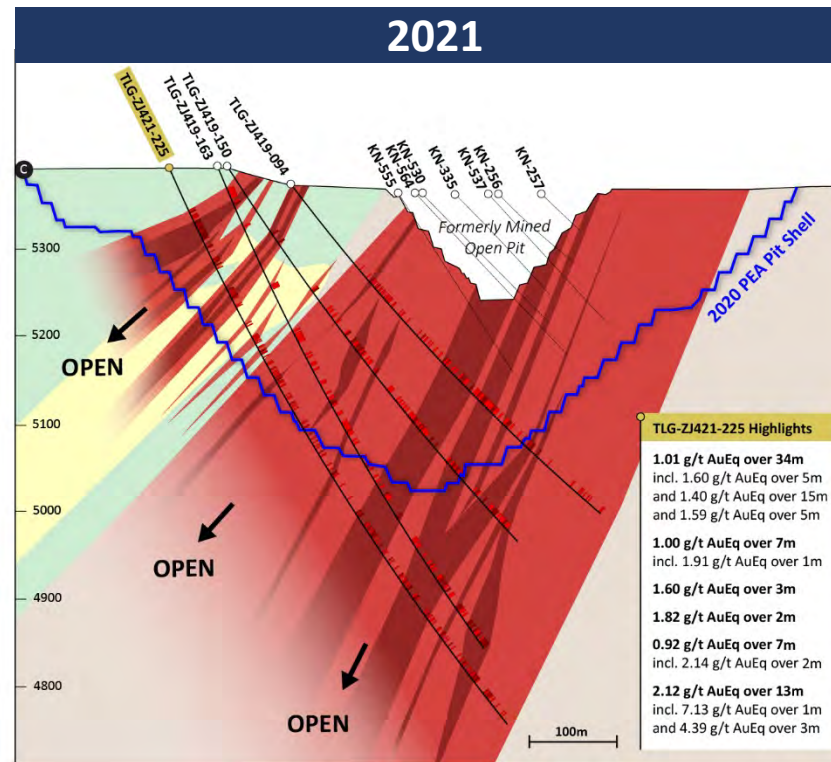

*See Appendix and press release dated July 28, 2020 for details and assumptions related to the 2020 mineral resource estimate

TYPICAL CROSS-SECTION: THEN AND NOW

J ZONE HIGHLIGHTS

New parallel zone of mineralization identified over a strike length of ~1.6km, primarily within undrilled areas of the PEA pit shell

DRILL HIGHLIGHTS:

- 1.57 g/t AuEq/31m, incl. 4.72 g/t AuEq/7m and 22.51 g/t AuEq/1m
- 2.24 g/t AuEq/8m, incl. 5.06 g/t/3m
- 1.60 g/t AuEq/13m, incl. 3.2 g/t /3m
- 1.19 g/t AuEq/19m, incl. 3.3 g/t /4m
- 1.51 g/t AuEq/19m, incl. 2.3 g/t/8m
- 1.43 g/t AuEq/19.3m, incl. 1.7 g/t/3m and 2.29 g/t/4.5m
- 1.48 g/t AuEq/11m
- 1.21 g/t AuEq/23m, incl. 2.5 g/t/7m
- 1.10 g/t AuEq/68m, incl. 1.65 g/t/10m
- 2.23 g/t AuEq/3m

* See press release dated May 12, 2021, and Appendix for details and assumptions related to the 2020 mineral resource estimate

NEW DISCOVERY: SOUTHWEST ZONE

SOUTHWEST HIGHLIGHTS

New discovery initially drilled in late 2019.
 Among best results ever drilled at Troilus.
 ~1.5km strike length & remains open

DRILL HIGHLIGHTS:

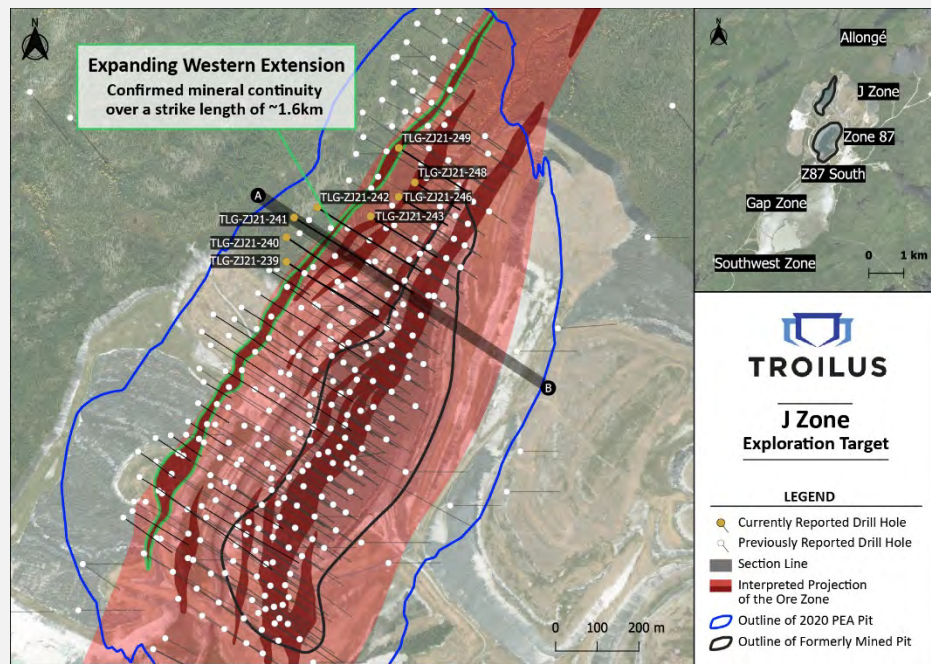

- 3.58 g/t AuEq over 15m, incl. 6.76 g/t over 7m
- 1.56 g/t AuEq over 73m, including 2.05 g/t over 48m
- 1.95 g/t AuEq over 20m, incl. 2.73 g/t AuEq over 9m
- 3.65 g/t AuEq over 9m, incl. 5.32 g/t AuEq over 6m
- 1.74 g/t AuEq over 21m, incl. 2.48 g/t AuEq over 6m and 2.5 g/t AuEq over 5m
- 6.66 g/t AuEq over 3m

*See press release dated April 8, 2021, and Appendix for details and assumptions related to the 2020 mineral resource estimate

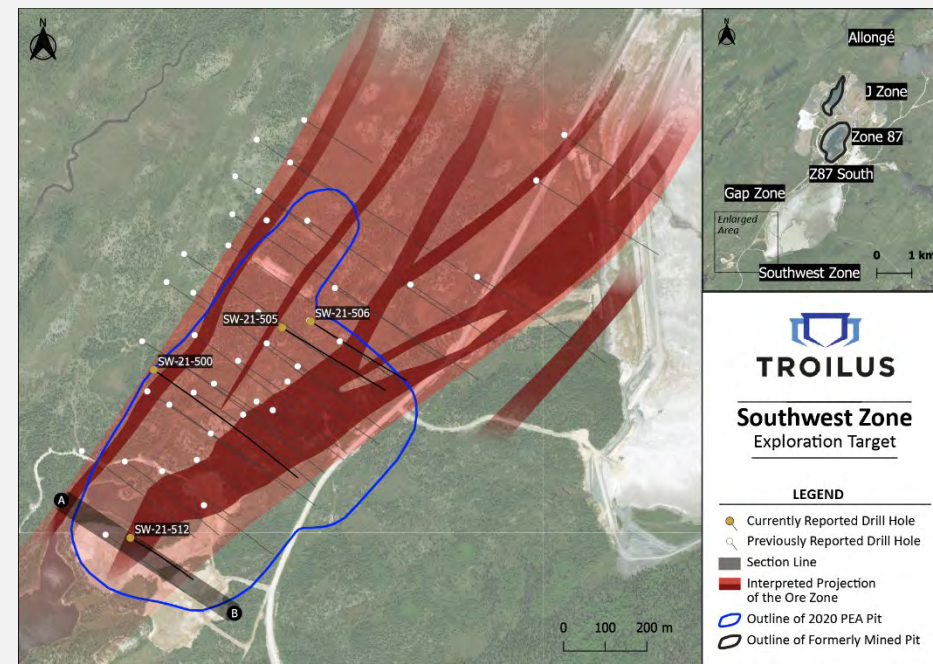

MAJOR TECHNICAL ADVANCEMENTS IN 2020/2021

J ZONE HANGING WALL

- New parallel zone of mineralization confirmed over strike length of ~1.6km
- Positive impact on upcoming PFS: New zone primarily located within undrilled areas of the PEA pit
- Remains open on strike and at depth

SOUTHWEST ZONE EXPANSION

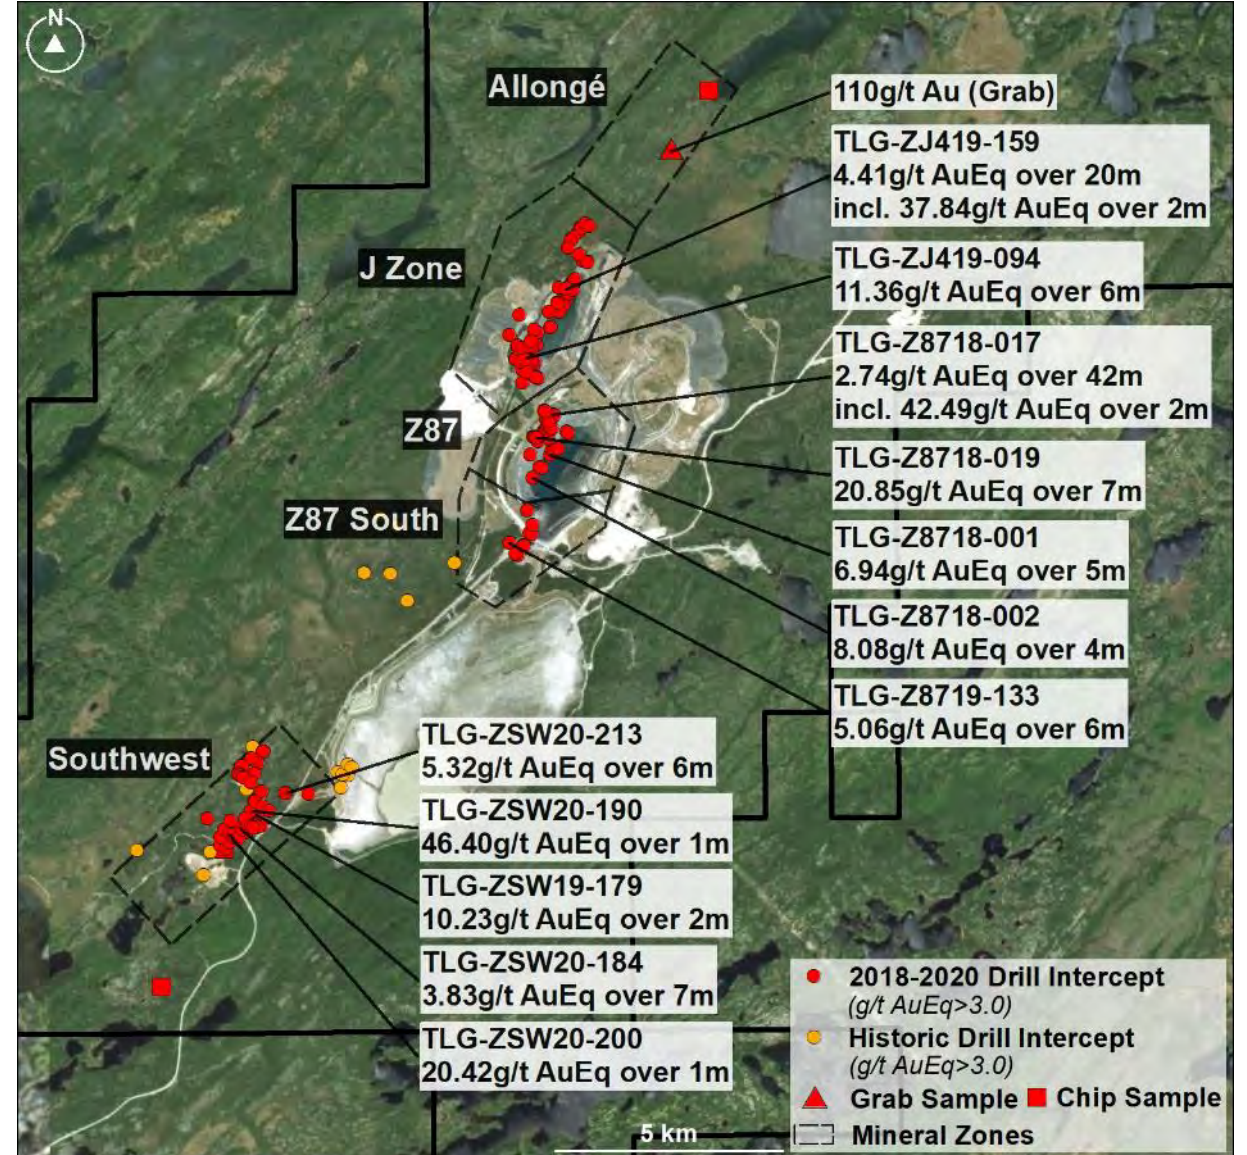

- Similar geology to main zone Z87
- Higher-grade zone than rest of deposit:
 - Hole ZSW21-512
3.58 g/t AuEq over 15m, incl. 6.76 g/t over 7m
 - Hole ZSW20-189
1.56 g/t AuEq over 73m, incl. 2.05 g/t over 48m
- Remains open
- Multi-million-ounce potential

HIGH GRADE AT TROILUS

High-grade gold system associated with fold and shear patterns within a broad base $\sim 1\text{g/t}$ deposit.

Identifiable and predictable throughout the deposit.

1 ALLONGÉ

2020 AISC Guidance (US\$/oz)⁽¹⁾

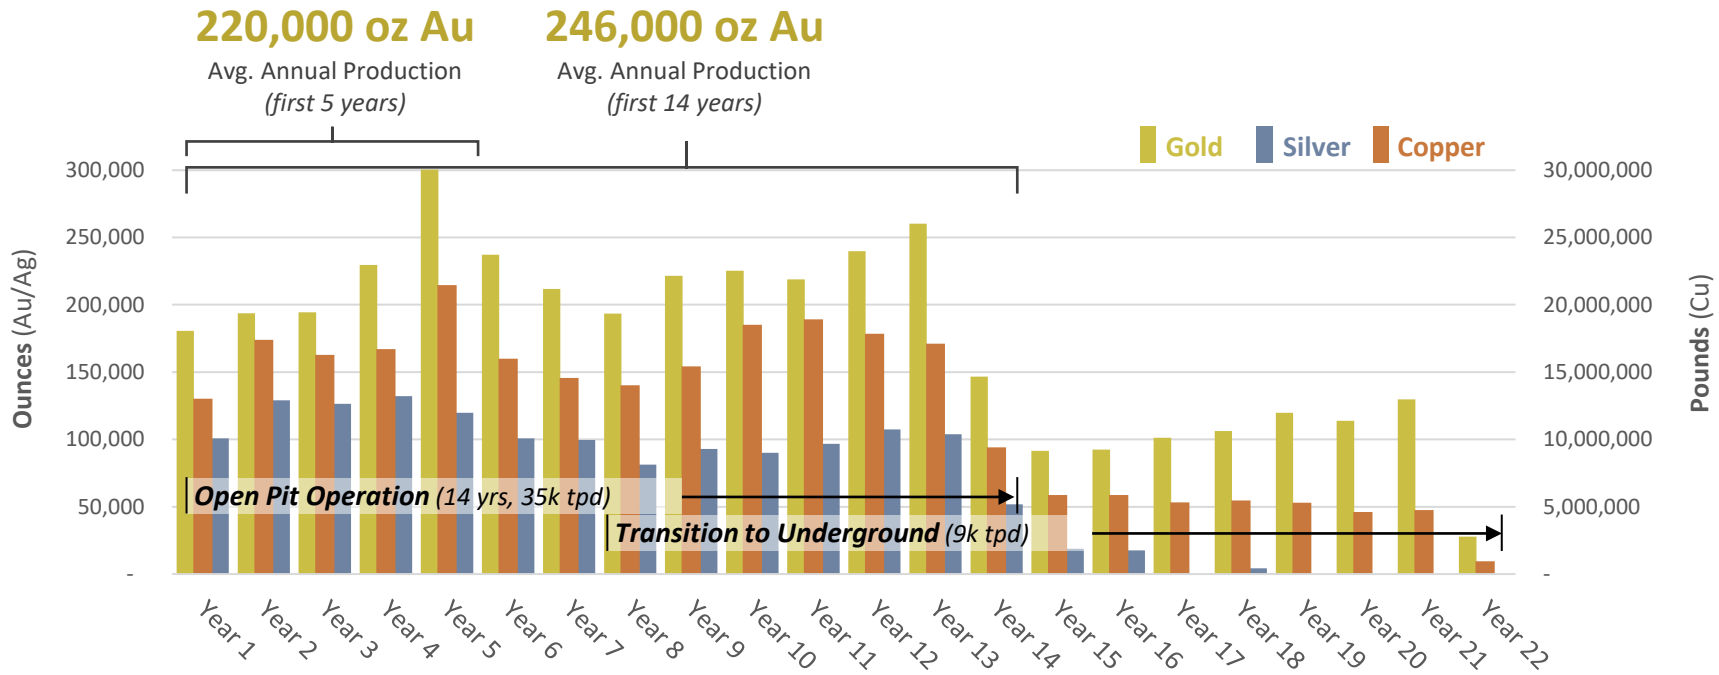

IMMEDIATE OPTIMIZATION IN UPCOMING PFS:

Not including 2.5% royalty buy-back completed in late 2020. PEA assumed copper price of \$3.00/lb.

*All figures reported in US\$ unless stated otherwise. US\$:C\$ exchange of \$0.74. \$719/oz cash costs and \$850/oz AISC are calculated on a pre-tax basis, in line with WGC guidelines, and include copper and silver credits. On a post-tax basis, cash operating costs are \$919 and AISC are \$1,051 per ounce of gold, not including copper and silver credits. Please see cautionary notes related to the PEA on p.2

Source: Company disclosures. Based on 2020 actuals reported, management guidance if actuals not yet reported. Some companies do not provide AISC on an asset level. Troilus metrics based on September 2020 PEA

PRODUCTION PROFILE – GOLD, COPPER & SILVER

TROILUS HAS THE POTENTIAL TO RANK AMONG THE TOP CANADIAN GOLD PRODUCERS

Annual Production Guidance (2020; Koz Au) ⁽¹⁾

Near-pits Mineral Growth Opportunities

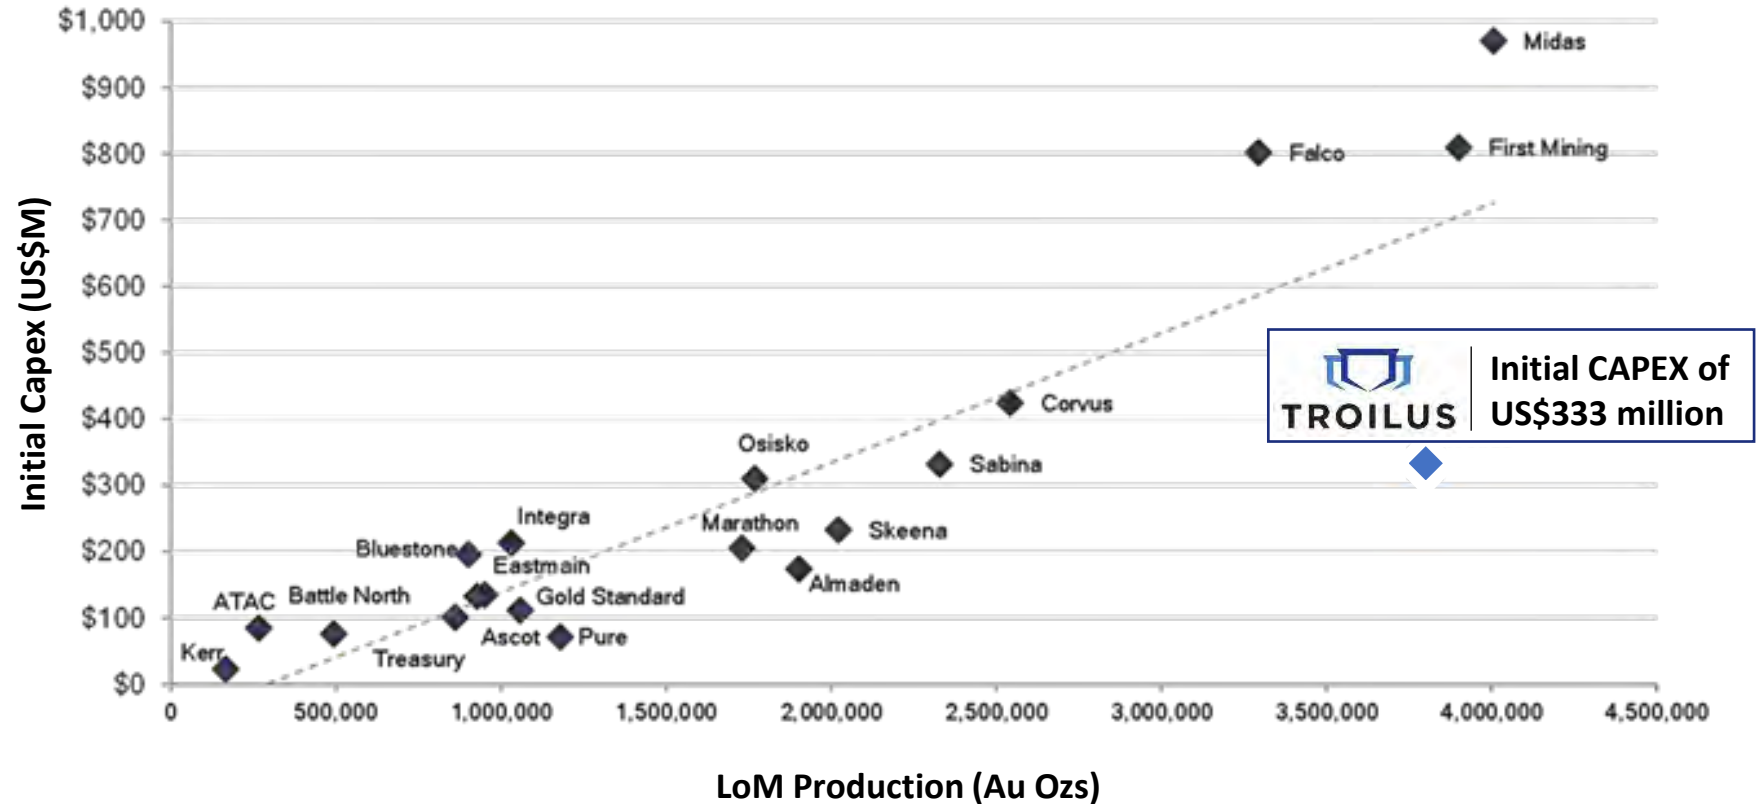

Source: Company disclosures
 (1)Based on 2020 actuals reported, management guidance if actuals not yet reported; Troilus metrics based on September 2020 PEA

BROWNFIELD ADVANTAGE

TROILUS STANDS OUT AMONG ADVANCED NORTH AMERICAN GOLD DEVELOPERS

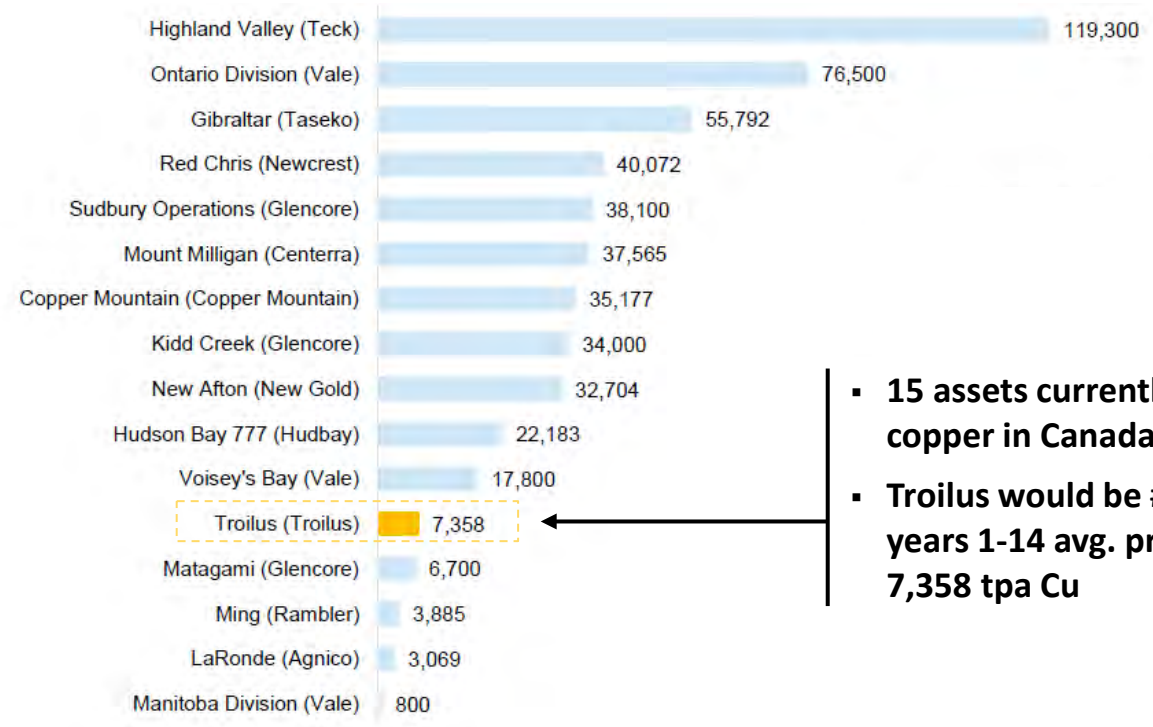

CAPITAL INTENSITY & LOM PRODUCTION OF NORTH AMERICAN GOLD DEVELOPERS

HIGHLY LEVERAGED TO COPPER

- **Copper production of 7,358 tonne per year (PEA 2020), placing Troilus among the top copper producers in Canada.**
- **Copper is expected to contribute 15.5% to Troilus' total revenue(PEA 2020).**
- **PEA assumed copper price of \$3.00/lb. Significantly positive impact on project economics using current copper prices.**

Canadian Copper Producing Assets – 2020 Cu Production (tonnes)

- **15 assets currently producing copper in Canada**
- **Troilus would be #12 based on years 1-14 avg. production of 7,358 tpa Cu**

UPCOMING PRE-FEASIBILITY STUDY: EXPECTATIONS & TARGETS

- Open pit only mining scenario, targeting +220,000 oz annual production
- Inaugural Reserve (Q4 2021) to feed into PFS; Targeting over 90% resource conversion from PEA
- PFS to reflect 2.5% royalty buy-back completed in late 2020
- Base case copper price expected to be higher than PEA assumed price of \$3.00/lb
- Targeting completion in Q1 2022; later than expected due to continued exploration success

RECENT MILESTONES & PATH FORWARD

Continuing to De-Risk and Unlock Value

- ✓ Southwest expansion & successful regional exploration on expanded property
- ✓ Mineral Resources increase by another 20%, 195% since acquiring Troilus
- ✓ Robust PEA
- ✓ Dewatering permit (Z87 & J4 pits)
- ✓ ECOLOGO Certification
- ✓ 2.5% royalty buy-back
- ✓ Recipient of AEMQ's "Excellence in Sustainable Development Award"

- ✓ Acquisition of UrbanGold Minerals
- ✓ Appointment of industry veteran as COO
- ✓ Upgraded to OTCQX Best Market
- ✓ Drilling @ 10,000m/mth focused on resource expansion & infill

UPCOMING

- New Resource Estimate & Inaugural Reserve
- Initiate Federal Permitting Process
- Pre-Feasibility Study (late 2021/early 2022)

Baseline studies & monitoring *(since 2018)*

Ongoing Drilling & Drill Results

Feasibility Study

Initiate Provincial Permitting Process

Provincial Approval

Construction Decision

Construction Financing

Infrastructure Upgrades

Federal Approval

Construction Start

HOW DOES TROILUS STAND OUT AMONG THE +3,500 JUNIOR MINING COMPANIES OUT THERE?

**TROILUS
GOLD CORP.**

**SABINA GOLD
& SILVER CORP.**

**ARTEMIS
GOLD INC.**

TSX: TLG

OTCQX: CHXMF

An aerial photograph of a vast, forested landscape. The terrain is a mix of dark green coniferous trees and lighter green, possibly cleared or regenerating areas. A network of winding roads or paths is visible, snaking across the terrain. Numerous small, irregularly shaped lakes or ponds are scattered throughout the landscape, reflecting the sky. The overall scene is a complex, natural environment.

Mineral Resource Summary

TROILUS' HISTORY AS A PAST-PRODUCER

1950's

Initial exploration

1986
Initial drilling

1993
Positive
Feasibility Study

1996-2010

Inmet Mining Corp. operated the Troilus mine;
+2Moz of gold and ~70,000t of copper produced

The Troilus Mine operated during a weak gold environment, which among other factors, resulted in minimal expansion drilling outside of the main mineralized zones to replace the mine's reserves.

2011
Failed merger with Lundin Mining

2012
Hostile takeover of Inmet
by First Quantum Minerals

2017
Troilus is acquired in Dec. 2017
- \$300,000 cash
- 2.5% NSR (bought back in Nov. 2020)

2018
Troilus Gold Corp. begins
trading on the TSX

STAKEHOLDER ENGAGEMENT

Signed Pre-Development Agreement (PDA) with the Cree Nation of Mistissini, the Grand Council of the Crees (Eeyou Istche) and the Cree Nation in July 2018¹

- Establishes the framework for the on-going and mutually beneficial relationship regarding business and employment opportunities for the Cree
- Facilitates continued support for exploration activities and preparation of the ESIA studies
- Illustrates the completion of the Impacts and Benefits Agreement (IBA) to show the economic viability of the Troilus Project

Justin Reid, CEO and John Matoush, Mistissini Community Liaison

REGIONAL GEOLOGY

MINERAL RESOURCE SUMMARY – ALL ZONES

Effective date of mineral resource: July 20, 2020

Total Open Pit & Underground	Tonnes (Mt)	Gold Equiv. (g/t)	Gold (g/t)	Copper (%)	Silver (g/t)	Contained Gold (Moz)	Contained Copper (Mlb)	Contained Silver (Moz)	Contained AuEq (Moz)
Indicated	177.30	0.87	0.75	0.08	1.17	4.30	322.60	6.66	4.96
Inferred	116.70	0.84	0.73	0.07	1.04	2.76	189.73	3.91	3.15

Total Open Pit

Indicated	164.20	0.80	0.68	0.08	1.20	3.62	284.69	6.32	4.21
Inferred	101.20	0.70	0.60	0.07	1.12	1.95	151.01	3.65	2.27

Total Underground

Indicated	13.10	1.79	1.61	0.13	0.81	0.68	37.91	0.34	0.75
Inferred	15.50	1.77	1.62	0.11	0.52	0.81	38.72	0.26	0.88

Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability;

Summation errors may occur due to rounding;

Open pit mineral resources are reported within an optimized constraining shells.

Open pit cut-off grade is 0.3 gpt AuEQ where the metal equivalents were calculated as follows:

Z87 Zone: $AuEq = Au \text{ grade} + 1.2566 * Cu \text{ grade} + 0.0103 * Ag \text{ grade}$

J4/J5 Zone: $AuEq = Au \text{ grade} + 1.2979 * Cu \text{ grade} + 0.0108 * Ag \text{ grade}$

SW Zone: $AuEq = Au \text{ grade} + 1.2768 * Cu \text{ grade} + 0.0106 * Ag \text{ grade}$

Metal prices for the AuEQ formulas are: \$US 1,600/ oz Au; \$3.25/lb Cu, and \$20.00/ oz Ag; with an exchange rate of US\$1.00:CAD\$1.30;

Metal recoveries for the AuEQ formulas are:

Z87 Zone: 83% for Au recovery, 92% for Cu recovery and 76% for Ag recovery

J4/J5 Zone: 82% for Au recovery, 88% for Cu recovery and 76% for Ag recovery

SW Zone: 82.5% for Au recovery, 90% for Cu recovery and 76% for Ag recovery

Underground cut-off grade is 0.9 AuEQ at Z87 Zone and J4/J5 Zone

*See additional disclosures related to the mineral resource calculation in Appendix

OPEN PIT MINERAL RESOURCES – BY ZONE

Effective date of mineral resource: July 20, 2020

	Tonnes (Mt)	Gold Equiv. (g/t)	Gold (g/t)	Copper (%)	Silver (g/t)	Contained Gold (Moz)	Contained Copper (Mlb)	Contained Silver (Moz)	Contained AuEq (Moz)
Z87 & Z87 South									
Indicated	84.60	0.92	0.79	0.09	1.39	2.15	169.54	3.77	2.50
Inferred	32.70	0.70	0.60	0.07	1.50	0.63	49.34	1.57	0.73
J Zone (J4 & J5)									
Indicated	79.60	0.67	0.57	0.07	1.00	1.47	115.16	2.55	1.71
Inferred	45.90	0.65	0.55	0.07	0.96	0.82	65.94	1.42	0.96

2020 MINERAL RESOURCE – GRADE DISTRIBUTION

Z87, Z87 South and J Zone

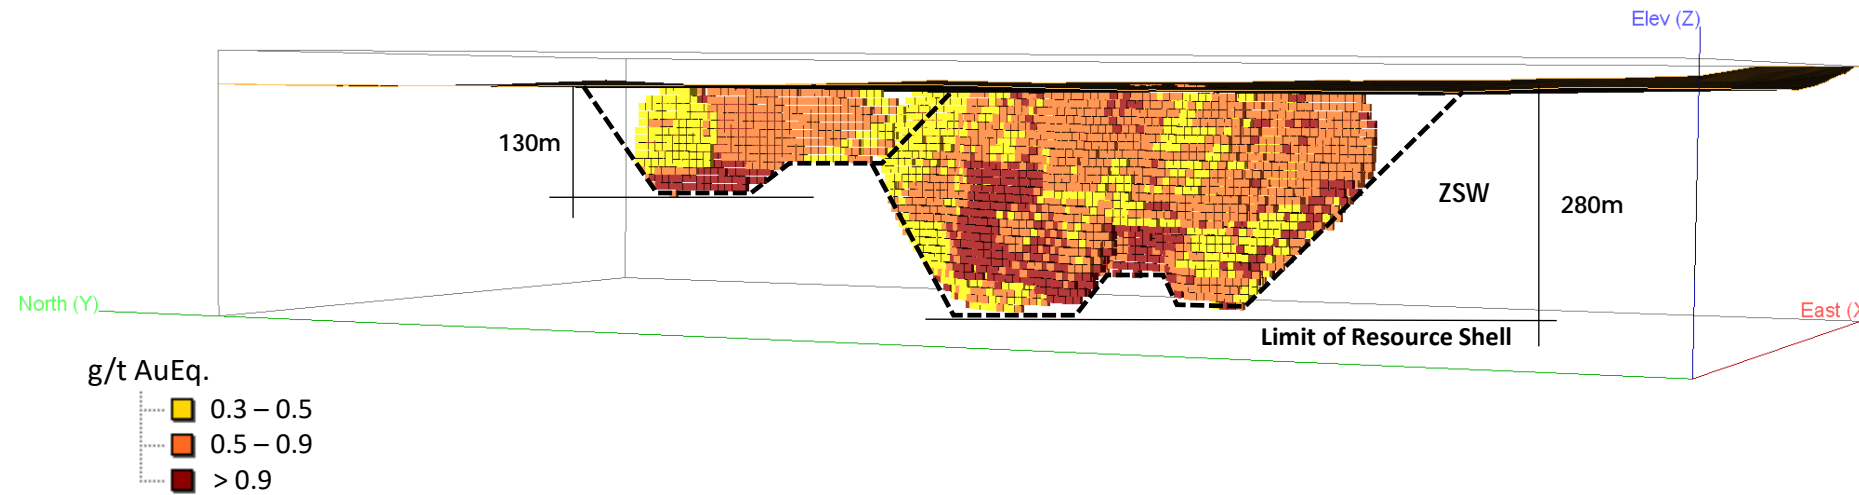

Above 0.3 g/t AuEq (open pit) & above 0.9 g/t AuEq (underground)

Classification 0.30 g/t OP and 0.90 g/t UG	Tonnes (Mt)	Gold (g/t)	Copper (%)	Silver (g/t)	Gold Equiv. (g/t)	Contained Gold (Moz)	Contained Copper (Mlb)	Contained Silver (Moz)	Contained AuEq (Moz)
Total Open Pit and Underground									
Indicated	177.3	0.75	0.08	1.17	0.87	4.30	322.60	6.66	4.96
Inferred	94.1	0.74	0.07	1.08	0.85	2.25	154.00	3.26	2.57

MINERAL RESOURCE GRADE DISTRIBUTION, SOUTHWEST ZONE

Above 0.3 g/t AuEq (open pit)

	Tonnes (Mt)	Gold (g/t)	Copper (%)	Silver (g/t)	Gold Equiv. (g/t)	Contained Gold (Moz)	Contained Copper (Mlb)	Contained Silver (Moz)	Contained AuEq (Moz)
Inferred	22.6	0.70	0.07	0.89	0.80	0.51	35.73	0.65	0.58

2020 MINERAL RESOURCE - ADDITIONAL DISCLOSURES

Effective date of mineral resource: July 20, 2020

The resource constraining shells were generated with:

Metal Prices of Gold \$US 1600/oz, Copper \$US 3.25/lb, Silver \$US 20/oz

Mining Costs:

- J Zone and 87 Zone base cost \$Cdn 1.71/t moved,
- SW Zone base cost \$Cdn 1.66/t moved
- Incremental cost \$Cdn 0.03/t waste moved, \$Cdn 0.02/t feed moved

Process and G&A Costs:

\$Cdn 8.44/t processed

Wall slopes:

Varied between 49.5 to 60 degrees depending on pit area and slope sector

Metal Recoveries:

Gold: 90% all zones except in lower grade (Au<1/2 g/t) portions of SW zone = 88%

Copper: 90% all zones except in higher grade (Cu%>0.13%) portions of SW zone = 92%

Silver: all zones 40%
